# Index to Volume 26

Author Index ..... 398
Biographical Sketches and Items ..... 399
Book Reviews ..... 399
Bowditch Lectures ..... 399
Care and Use of Animals ..... 399
Careers in Physiology ..... 399
Centennial Celebration ..... 399
Cumulative Index ..... 399
Education ..... 399
FASEB ..... 399
Fellowship Awards and Prizes ..... 399
Financial Affairs of APS ..... 399
Governance of the Society ..... 399
History ..... 400
Honors and Awards to APS Members ..... 400
International News ..... 400
Meetings of the Society ..... 400
Membership of APS: Statistics and Status Reports ..... 400
Memorials to Physiologists ..... 400
Miscellany ..... 400
William T. Porter Fellowship ..... 400
Presidents of the Society ..... 400
Program Planning and Paper Presentation ..... 400
Public Affairs and Public Information ..... 400
Publications of the APS ..... 400
Senior Physiologists ..... 400
Socioeconomic Data Concerning Physiologists ..... 400
Special Interest Groups and Sectionalization of the Society ..... 400
Symposia ..... 400
Women and Minorities ..... 400

## Author Index

**Abendschein, D. R.** Static Mechanical Properties of Lungs and Chest Wall of the Dog. 26(2): 102–107

**Alexander, R. S.** Pitts and Urine Acidification. 26(6): 364–366

**Alvarenga, G. P.** Non-Directive Method For Teaching Physiology. 26(4): 229–235

**Annegers, J. H.** Department of Physiology: Northwestern University Medical School. 26:(3): 120–121

**Barry, B. E.** Mechanisms of Hyperoxic Injury to the Pulmonary Microcirculation. 26(3): 170–176

**Bell, D. R.** Basic Science Department in a Private Medical School. 26(5): 275–276

**Beraldo, W. T.** Non-Directive Method For Teaching Physiology. 26(4): 229–235

**Blatteis, C. M.** Steven M. Horvath International Jubilee. 26(5): 285

**Boyle, J. III.** PuFT: Computer-Assisted Program for Pulmonary Function Tests. 26(2): 97–101

**Bragg-Remschel, D. A.** Ambulatory Monitoring of Electrocardiograms—Current Technology of Recording and Analysis. 26(1): 39–42

**Brenner, L.** Heartsim: A Cardiovascular Simulation With Didactic Feedback. 26(4): 236–239

**Budinger, T. F.** Recent Advances in Physiological Monitoring. 26(1): 29–30

**Budinger, T. F.** Positron Emission Tomography of the Heart. 26(1): 31–34

**Chasis, H.** History of Collaboration by Department of Physiology at New York University School of Medicine. 26(2): 64–70

**Christman, C. W.** Free Oxygen Radicals in Cerebral Vascular Responses. 26(3): 165–169

**Coleman, T. G.** HUMAN—A Comprehensive Physiological Model. 26(1): 15–21

**Cooke, P. S.** Hormonal Control of Fetal Growth. 26(5): 317–323

**Cooper, T.** Leaving the Island Behind: An Approach to Animal Experimentation Issue. 26(6): 359

**Coulson, R. L.** Problem-Based Student-Centered Learning of the Cardiovascular System Using the Problem-Based Learning Module (P.B.L.M.). 26(4): 220–224

**Crapo, J. D.** Mechanisms of Hyperoxic Injury to the Pulmonary Microcirculation. 26(3): 170–176

**Crawford, M. A.** A Separate Course for Experiments in Cardiovascular Physiology. 26(4): 212–215

**Czech, M. P.** Structural and Functional Aspects of the Receptors for Insulin and the Insulin-Like Growth Factors. 26(4): 190–193

**Derenzo, S. E.** Positron Emission Tomography of the Heart. 26(1): 31–34

**Dill, D. B.** Dedication of the Nello Pace Laboratory. 26(6): 369–370

**Di Palma, J. R.** Distinguished American Physiologist. Samuel Robert Means Reynolds. 26(5): 267–268

**Donald, D. E.** Hiram Eli Essex: 27th APS President. 26(1): 1–3

**Ellis, E. F.** Free Oxygen Radicals in Cerebral Vascular Responses. 26(3): 165–169

**Elwell, L. H.** Department of Physiology, Oregon Health Sciences University, Portland. 26(5): 269

**Engelberg, J.** Integrative Physiology: On Mapping the Organism. 26(3): 142–144

**Enna, S. J.** Receptor Regulation. 26(4): 187–189

**Farhi, L. E.** Role of Computer Graphics in Simulations for Teaching Physiology. 26(2): 93–95

**Feldman, J. L.** Control of Vertebrate Respiration and Locomotion: A Brief Account. 26(5): 310–316

**Filley, G. F.** Graphic Representation of $CO_2$ Equilibria in Biological Systems. 26(5): 304–309

**Freeman, B. A.** Mechanisms of Hyperoxic Injury to the Pulmonary Microcirculation. 26(3): 170–176

**Freire-Maia, L.** Neurotoxins as Tools for Physiological Investigation. 26(6): 381–390

**Gaar, K. A., Jr.** A Simple Model of the Pulmonary Circulation for Hemodynamic Study and Examination. 26(6): 390–393

**Galligan, J. E.** Leaving the Island Behind: An Approach to Animal Experimentation Issue. 26(6): 359

**Ganz, E.** Positron Emission Tomography of the Heart. 26(1): 31–34

**Goerke, J. R.** Static Mechanical Properties of Lungs and Chest Wall of the Dog. 26(2): 102–107

**Granger, D. N.** Role of Oxygen Radicals in the Pathogenesis of Intestinal Ischemia. 26(3): 159–164

**Granger, D. N.** Basic Science Department in a State-Funded Medical School. 26(5): 276–278

**Grillner, S.** Control of Vertebrate Respiration and Locomotion: A Brief Account. 26(5): 310–316

**Guyton, A. C.** A Random Molecular Motion Basis for Equations of Neutral Solute and Fluid Flow. 26(5): 326–328

**Hazelrig, J. B.** Analysis of Physiological Systems via Mathematical Methods. 26(3): 144–147

**Hempling, H. G.** New Computer-Based Teaching Programs. 26(2): 108

**Hillman, B. J.** Digital Radiological Monitoring of Renal Physiology. 26(1): 35–38

**Huesman, R. H.** Positron Emission Tomography of the Heart. 26(1): 31–34

**Jackson, T. E.** A Random Molecular Motion Basis for Equations of Neutral Solute and Fluid Flow. 26(5): 326–328

**Kindig, N. B.** Graphic Representation of $CO_2$ Equilibria in Biological Systems. 26(5): 304–309

**Kline, D. L.** Department of Physiology, University of Cincinnati College of Medicine. 26(6): 366–368

**Knittel, B.** Positron Emission Tomography of the Heart. 26(1): 31–34

**Kontos, H. A.** Free Oxygen Radicals in Cerebral Vascular Responses. 26(3): 165–169

**Kostreva, D. R.** 28th Annual Bowditch Lecture. Functional Mapping of Cardiovascular Reflexes and the Heart Using 2-[$^{14}$C]deoxyglucose. 26(6): 333–350

**Levasseur, J. E.** Free Oxygen Radicals in Cerebral Vascular Responses. 26(3): 165–169

**Levy, M. N.** Hunting the Wild Vagus. Wiggers Award Lecture. 26(3): 115–118

**Levy, M. N.** Cardiovascular Deconditioning of Space Flight. 26(5): 297–303

**Mahley, R. W.** Lipoprotein Receptors and Their Role in Cholesterol Metabolism. 26(4): 194–199

**Manning, R. D.** A Random Molecular Motion Basis for Equations of Neutral Solute and Fluid Flow. 26(5): 326–328

**Marshall, L. H.** More on Burt Green Wilder at Cornell. 26(6): 361–363

**Martin, D.** Oxygen Radicals and the Microcirculation. 26(3): 152–155

**Mathis, C. A.** Positron Emission Tomography of the Heart. 26(1): 31–34

**McCord, J. M.** Biochemistry and Pathophysiology of Superoxide. 26(3): 156–158

**McKenzie, J.** Basic Science Department in a Government-Funded Medical School. 26(5): 278–280

**Meindl, J. D.** Telemetry Methods: Animal and Man. 26(1): 47–50

**Michael, J.** Teaching Cardiovascular Physiology Outside the Lecture Hall. Introduction. 26(4): 209

**Michael, J. A.** CV Pathophysiology Problems in Small Group Tutorials. 26(4): 225–228

**Michael, J. A.** What Are We Doing Outside Of The Lecture Hall and Why Are We Doing It: A Summary. 26(4): 240

**Michael, J. A.** Computers in Physiology Teaching: How Can APS Help? 26(5): 323–325

**Mines, A. H.** Static Mechanical Properties of Lungs and Chest Wall of the Dog. 26(2): 102–107

**Modell, H. I.** Role of Computer Graphics in Simulations for Teaching Physiology. 26(2): 93–95

**Moffatt, D. S.** A Random Molecular Motion Basis for Equations of Neutral Solute and Fluid Flow. 26(5): 326–328

**Moyer, B. R.** Positron Emission Tomography of the Heart. 26(1): 31–34

**Murray, P. A.** Initiation of an Academic Career in a Clinical Department in a Private Medical School as a Ph.D. Physiologist. 26(5): 280–281

**Nicoll, C. S.** Hormonal Control of Fetal Growth. 26(5): 317–323

**Olszowka, A. J.** Role of Computer Graphics in Simulations for Teaching Physiology. 26(2): 93–95

**Parks, D. A.** Role of Oxygen Radicals in the Pathogenesis of Intestinal Ischemia. 26(3): 159–164

**Plewes, J. L.** Role of Computer Graphics in Simulations for Teaching Physiology. 26(2): 93–95

**Povlishock, J. T.** Free Oxygen Radicals in Cerebral Vascular Responses. 26(3): 165–169

**Randall, J. E.** HUMAN—A Comprehensive Physiological Model. 26(1): 15–21

**Randall, W. C.** Is Medical Research in Jeopardy? 26(2): 73–77

**Randall, W. C.** President-Elect's Tour. From Whence Cometh Future Physiologists? 26(3): 123–125

**Randall, W. C.** Past President's Address. Crises in Physiological Research. 26(6): 351–356

**Rasch, R. W.** The Regulation of Acid-Base Balance—A Microprocessor Simulation. 26(1): 24–28

**Repine, J. E.** Oxygen Radicals and Lung Edema. 26(3): 177–181

**Richardson, D.** The Selective Lab: An Alternative to Cookbook Experiments. 26(4): 216–219

**Rothe, C. F.** Trends in Physiology Teaching Laboratories for Medical Students—1982. 26(3): 148–149

**Rothe, C. F.** A Mechanical Model of the

Cardiovascular System for Effective Teaching. 26(4): 210–211
**Rovick, A. A.** CV Pathophysiology Problems in Small Group Tutorials. 26(4): 225–228
**Rovick, A. A.** Heartsim: A Cardiovascular Simulation With Didactic Feedback. 26(4): 236–239
**Rovick, A. A.** What Are We Doing Outside the Lecture Hall and Why Are We Doing It. A Summary. 26(4): 240
**Sandler, H.** Recent Advances in Physiological Monitoring. 26(1): 29–30
**Sandler, H.** Telemetry Methods: Animal and Man. 26(1): 47–50
**Schmidt-Nielsen, B.** A History of Renal Physiology at The Mount Desert Island Biological Laboratory. 26(5): 261–266
**Schwartz, A.** Calcium Channel Inhibitors. 26(4): 200–205
**Shah, P. K.** Clinical Applications of Bedside Hemodynamics Monitoring Using the Swan-Ganz Catheter. 26(1): 43–46
**Sonnenschein, R. R.** John Field (1902–1983). 26(5): 268
**Staub, N. C.** Static Mechanical Properties of Lungs and Chest Wall of the Dog. 26(2): 102–107
**Stinson, J. M.** Department of Physiology: Meharry Medical College. 26(3): 119–120
**Stjärne, L.** Ulf von Euler. 26(5): 282–283
**Talbot, J. M.** Cardiovascular Deconditioning of Space Flight. 26(5): 297–303
**Tate, R. M.** Oxygen Radicals and Lung Edema. 26(3): 177–181
**Taylor, A. E.** Oxygen Radicals and the Microcirculation. 26(3): 152–155
**Traber, D. L.** A Separate Course for Experiments in Cardiovascular Physiology. 26(4): 212–215
**Turrens, J. F.** Mechanisms of Hyperoxic Injury to the Pulmonary Microcirculation. 26(3): 170–176
**Walker, J. R.** A Separate Course for Experiments in Cardiovascular Physiology. 26(4): 212–215
**Wei, E. P.** Free Oxygen Radicals in Cerebral Vascular Responses. 26(3): 165–169
**Winkle, R. A.** Ambulatory Monitoring of Electrocardiograms—Current Technology Recording and Analysis. 26(1): 39–42.
**Wolf, M. B.** Regulation of Cell Volume and Electrolytes: A Computer-Assisted Instruction Program. 26(6): 394–396
**Yano, Y.** Positron Emission Tomography of the Heart. 26(1): 31–34
**Young, S. L.** Mechanisms of Hyperoxic Injury to the Pulmonary Microcirculation. 26(3): 170–176

## Biographical Sketches and Items

Berliner, R. W. 26(1): 3
Essex, H. E. 26(1): 1–3
Fishman, A. P. 26(3): 122
Horvath, S. M. 26(5): 285

## Book Reviews

26(1): 52–54
26(2): 109
26(3): 150
26(5): 328–329
26(6): 396

## Bowditch Lecture

Kostreva, D. R. 28th Annual Bowditch Lecture. Functional Mapping of Cardiovascular Reflexes and the Heart Using 2-[$^{14}$C]deoxyglucose. 26(6): 333–350

## Care and Use of Animals

Committee Report
26(3): 129–130
APS Statement on NIH Guide Revisions
26(3): 113–114
26(5): 273–274
APS Representative's Report on AAALAC Board of Trustees. 26(3): 136–137
APS Testimony on S.657. 26(5): 271–272
Guiding Principles in the Care and Use of Animals
26(3): 114
26(6): 356
If Laws Are Needed APS Council Favors Proposal by Sen. Dole. 26(3): 113
Letter to APS from AAALAC Board of Trustees. 26(3): 137
Cooper, T., and J. E. Galligan. Leaving the Island Behind: An Approach to Animal Experimentation. 26(6): 359–36
Landers, A. From the *Washington Post*. 26(6): 358
Samuels, W. M. Animal Rights Groups Escalate Movement to Malicious Actions. 26(1): 4–5
Samuels, W. M. Congress May Have Three Choices in Legislation Proposed for Animals. 26(2): 71–72
Samuels, W. M. Congress Has Something For Everyone. 26(3): 112–113
Samuels, W. M. Animal Issues Take Backseat as House Debates NIH Proposals. 26(5): 270–271
Samuels, W. M. Effort Made to Repeal Proposed Ban on Funds for DOD Animal Uses. 26(6): 357–358

## Careers in Physiology

Proc. of Symposium Teaching Cardiovascular Physiology Outside the Lecture Hall. 26(4): 209–240
Basic Science Department in a Private Medical School. 26(5): 275–276
Basic Science Department in a State-Funded Medical School. 26(5): 276–278
Basic Science Department in a Government-Funded Medical School. 26(5): 278–280
Initiation of an Academic Career in a Clinical Department in a Private Medical School as a Ph.D. Physiologist. 26(5): 280–281

## Centennial Celebration

Committee Report
26(3): 130
APS Centennial Fund. 26(1): 61

## Cumulative Index

*The Physiologist*. 1980–82 (vols. 23–25). 26(1): 56–61

## Education

Committee Report
26(3): 131
Computer-Assisted Instruction and Simulation
Boyle. 26(2): 97–101
Coleman and Randall. 26(1): 15–21
Gaar. 26(6): 390–393
Hempling. 26(2): 108
Modell, Olszowka, Plewes, and Farhi. 26(2): 93–95
Rasch. 26(1): 24–28
Wolf. 26(6): 394–396
*Physiology Teacher*
26(1): 15–54
26(2): 93–109
26(3): 142–150
26(5): 304–329
26(6): 381–396
Laboratory Exercise
Mines, Goerke, Abendschein, and Staub. 26(2): 102–107
Teaching Methods
Engelberg. 26(3): 142–144
Hazelrig. 26(3): 144–147
Kindig and Filley. 26(5): 304–309
Michael. 26(5): 323–325
Moffatt, Jackson, Manning, and Guyton. 26(5): 326–328
Rothe. 26(3): 148–149
Tutorial Lectures
Bragg-Remschel and Winkle. 26(1): 39–42
Budinger, Yano, Huesman, Derenzo, Moyer, Mathis, Ganz, and Knittel. 26(1): 31–34
Cooke and Nicoll. 26(5): 317–323
Feldman and Grillner. 26(5): 310–316
Freire-Maia. 26(6) 381–390
Hillman. 26(1): 35–38
Sandler and Budinger. 26(1): 29–30
Sandler and Meindl. 26(1): 47–50
Shah. 26(1): 43–45

## FASEB

Life Sciences Research Office
New Studies Underway. 26(1): 9–10
Reports Available. 26(1): 10
Cardiovascular Deconditioning of Space Flight. 26(5): 297–303
Office of Computer Services: Computer Programs Catalog Project. 26(5): 325
Summer Conference Series for 1983. 26(1): 10

## Fellowship Awards and Prizes

1984 Lita Annenberg Hazen Awards. 26(5): 292
Burroughs Wellcome Awards
Scholar Award in Pharmacoepidemiology. 26(6): 360
Wellcome Visiting Professorships in Basic Medical Sciences. 26(1): Inside Back Cover
NASA Space Biology Grant Program. 26(1): 10
National Research Council
Research Associateships. 26(6): 360
Minority Postdoctoral Fellowships. 26(6): 360

## Financial Affairs of APS

Committee Report
26(3): 131–132
Contributions
26(2): 81
26(6): 375–376
Sustaining Associates
26(1): 9
26(2): 80

## Governance of the Society

APS Committees, Their Principal Functions and Membership (1983–84). 26(4): 244–247
